PERSONAL PROFILE

Experienced Front-End Developer with 3 years of in depth knowledge of HTML, CSS, JavaScript and React. I have a proven track record in developing and deploying web applications and services.

WORK EXPERIENCE

FRONT END DEVELOPER

Southern New Hampshire Univ.   **2023 - PRESENT**

- Design intuitive and engaging user interfaces that enhance the overall user experience for prospective students, faculty, and other site visitors.
- Conduct user research and usability testing to gather feedback and insights for continuous improvement. Ensure accessibility and inclusivity compliance to reach a diverse audience.

SOFTWARE DEVELOPER

Empyrean Benefits Solutions   **2021 - 2023**

- Worked as a member of an agile team, helped push new features from design to production in less than four weeks, by completing the development and the testing of a new feature that provided a key benefit to the end user.
- Collaborated with back-end developers to implement new pages for the company platform using MVC, which improved the user experience and increased conversion.
- Improved codebase readability by refactoring components using functional programming principles, which resulted in improvement in code performance.
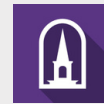

BUSINESS SYSTEMS ANALYST

Empyrean Benefits Solutions   **2017 - 2021**

- Responsible for the system configuration and setup for clients which includes setup, test plan execution, import configuration, and client acceptance testing.
- Oversaw the premium reporting process after noticing the start-to-finish process identified inefficiencies by creating automated queries and increasing time savings by 40% 122 hours a month)
- Processed and published 60 standard operating procedure guides for process utilization ensuring start-to-finish understanding of all tasks and training.
- Utilizes front-end frameworks such as HTML and CSS for unique user interface customizations and ensures that each site is responsive across platforms.
